# Welcome Message

Dear Colleagues,

It is with considerable pleasure that we extend to you the invitation to attend the **8th International Thymic Malignancy Interest Group Annual Meeting (ITMIG 2017), to be held on September 21 – 23, 2017 in Torino, Italy.**

Established scientists and clinicians from all over the globe will join together to contribute to and energize research in thymic tumors and the thymus gland. This conference features the latest scientific and clinical developments related to the management of thymic malignancies.

We look forward to seeing you in Torino this September and hope you take a little bit of extra time to travel through a territory of art, culture and nature.

Best Regards,

A handwritten signature in blue ink, appearing to read 'P. Filosso', is positioned to the left of the name and title.

**Prof. Pier Luigi Filosso**

## ITMIG

International  
Thymic  
Malignancy  
Interest Group

**The mission of ITMIG is to promote the advancement of clinical and basic science pertaining to thymic and other mediastinal malignancies and related conditions.**

The primary goals of ITMIG are to provide infrastructure for international collaboration, promote a scientifically-based approach, and facilitate dissemination of knowledge about thymic malignancies and other mediastinal disease, in order to improve the outcomes of people diagnosed with such a condition.

ITMIG is a registered not-for profit and multispecialty organization, involving thoracic surgeons, medical and radiation oncologists, pulmonologists, radiologists, pathologists, neurologists, and basic science researchers.

# Conference Information

## Conference Venue

All ITMIG Sessions as well as Registration, Exhibits and Posters will take place at the Centro Congressi Lingotto.

### → Centro Congressi Lingotto

FCA PARTECIPAZIONI S.p.A.  
Via Nizza, 280  
10126 Torino, Italy

Opened in 1923, Lingotto was designed by architect Matté Trucco. It was unusual in that it had five floors, with raw materials going in at the ground floor, and cars built on a line that went up through the building. Finished cars emerged at rooftop level to go onto the test track. It was the largest car factory in the world at that time.

The factory became outmoded in the 1970s and closed in 1982. By 1989, factory was rebuilt into a modern complex, with concert halls, theatre, a convention centre, shopping arcades and a hotel. The test track was retained, and can still be visited today on the top floor of the shopping mall.
